

Yarlet School

Policy on First Aid (including Boarding and EYFS)

1. School responsibility:

The School's Matron, all academic teaching staff, members of the Senior Leadership team and School Secretaries have attended a First Aid at Work course or a Paediatric First aid course in accordance with the statutory framework. The names of those qualified in First Aid and the requirement of updated training are held by the School Secretary/Matron.

2. School procedures – Main School

- When a pupil becomes injured or unwell they report to the School Secretary who will contact Matron or administer first aid themselves.
- When a pupil becomes very seriously unwell, or is injured, an ambulance should be called for immediately and parents or relatives notified.
- If there is known to be a case of any infectious disease e.g. chicken pox, it is the responsibility of the school to inform parents by either telephone or by letter.
- All injuries sustained whilst at school are treated by the Matron, the School Secretaries or other qualified First Aider at the point of need.
- In Main School all injuries are recorded in the dispensary. A full description of the injury, the circumstances and events leading up to the incident are recorded.
- Parents are either informed by phone, on collection of child or the incident is noted in the pupil's home-school diary.
- In the event of a pupil receiving a bump to the head, a "bump note" is sent home.
- Appropriate barrier methods are used when dealing with the spillage of bodily fluids.
- Where teachers have a serious concern about a child's well-being, an ambulance will be called and a member of staff or the child's parent will accompany them to the hospital.

3. School procedures - Pre-Prep, EYFS and After School Care

- When a pupil becomes injured or unwell their class teacher contacts Matron or administers first aid themselves.
- When a pupil becomes very seriously unwell, or is injured, an ambulance should be called for immediately and parents or relatives notified.
- If there is known to be a case of any infectious disease e.g. chicken pox, it is the responsibility of the School to inform Parents by either telephone or by letter.
- All injuries sustained whilst at school are treated by the Matron or other qualified First Aider at the point of need.
- Accident records are kept within each first aid box. A full description of the injury, the circumstances and events leading up to the incident are recorded.
- EYFS pupils are treated by Paediatric First Aiders.
- Parents are informed by phone if necessary and the incident is noted in the pupil's home-school diary.

- In the event of a pupil receiving a bump to the head, a “bump note” is sent home with the pupil.
- Appropriate barrier methods are used when dealing with the spillage of bodily fluids.
- Where teachers have a serious concern about a child’s well-being an ambulance will be called and a member of staff or the child’s parent will accompany them to the hospital.

4. First Aid Kits

First Aid kits are placed in the School Dispensary, the Secretary’s Office, Centenary Hall and the Early Years Building. These are maintained by the Matron. In the event of any off-site visits or away fixtures, first aid kits and any other required medicines are taken along.

5. Sports injuries

The focus on sport at Yarlet increases the likelihood of a sports related injury. Sports teachers and coaches are therefore trained in first aid. Sometimes pupils attend off-site sports fixtures when accidents may occur. The accompanying staff should therefore be trained in first aid and carry first aid kits.

6 Renewal of training

Most Yarlet staff are trained in first aid. The school monitors such training as it is conscious of the need to renew such training ever three years.

7. Procedures for Pupils with particular medical conditions

Please refer to the School Administration of Medicines Policy.

8. Minimum First Aid coverage

The school is committed to having a minimum of at least one qualified paediatric first aider on site at all times when children are present. Typically the provision far exceeds this.

9. RIDDOR

In compliance with RIDDOR the school will report to the Health and Safety Executive Tel: 0845 300 99 23 any occurrences of Injuries, Diseases and Dangerous Occurrences.
